

Connecting Rod

April 2013

Oregon SAE Newsletter

The Oregon SAE governing board received an update from Oregon Institute of Technology Formula SAE team recently and wanted to share their progress with the general membership.

OIT racing wrote to us in January, *“Currently the 2012-2013 team is in the midst of finalizing designs and moving to manufacturing. Attached are photos of the frame progress as well. We have changed the design of the frame to allow for better engine placement, shortening the length of the car and vehicle responsiveness. The team is moving swiftly and efficiently to have a completed car for the June competition.”*

Oregon SAE was proud to be able provide grant funds for the 2011-12 OIT Formula SAE vehicle. And we are very glad it helped them get to competition last year. From the team’s website, *“In 2012 the team scored an impressive 5th place position in Acceleration and 16th place in the Autocross event. Finishing overall in 35th place out of 77 schools that participated, there is still a lot of development to be done as we approach the 2013 season.”*

Congratulations on last year’s success, OIT. We expect great things this year too.
